

# YOUSSEF GEBALY

Cairo, Egypt • [www.youssefgebaly.com](http://www.youssefgebaly.com) • +20 1555454377 • [youssefgebaly321@gmail.com](mailto:youssefgebaly321@gmail.com) • [linkedin.com/in/youssefgebaly](https://linkedin.com/in/youssefgebaly)

AI Engineer and Cloud Architect specializing in large language models, RAG systems, and production ML deployment on Oracle Cloud Infrastructure. Recent Computer Science & AI graduate with hands-on experience building enterprise-grade AI applications, implementing real-time analytics platforms, and developing end-to-end ML pipelines. Proven track record of delivering measurable business impact through innovative AI solutions with 80%+ accuracy and quantifiable ROI.

## TECHNICAL SKILLS

---

**AI & Machine Learning:** Large Language Models (LLMs), RAG Systems, Natural Language Processing, Computer Vision, Deep Learning, TensorFlow, PyTorch, Spark MLlib, Llama 3.3, Claude (Anthropic), Statistical Learning, Sentiment Analysis, Recommendation Systems, GPU Acceleration

**Cloud & Data Engineering:** Oracle Cloud Infrastructure (OCI), Oracle Autonomous Database 23ai, AI Vector Search, Azure, Real-time Streaming (Kafka/OCI Streaming), Delta Lake, Database Design, SQL, Networking, ETL Pipelines

**Programming & Development:** Python, JavaScript, TypeScript, SQL, C++, Java, React.js, Next.js, Node.js, REST APIs, Software Architecture, Algorithms & Data Structures, Agile Methodologies, Agentic Solutions

**Languages:** English (Native), Arabic (Native), Spanish (Professional)

## PROFESSIONAL EXPERIENCE

---

### AI Engineer - CSS | Oracle

Cairo, Egypt • September 2025 - Present

- Architected production RAG (Retrieval-Augmented Generation) application using Next.js 15, Oracle Autonomous Database 26ai with 1024-dimension AI Vector Search via OCI Cohere embeddings, and Anthropic Claude Sonnet 4.5 for intelligent document Q&A supporting PDF, DOCX, and TXT formats
- Engineered enterprise AI platform demo suite demonstrating 80% faster time-to-insight and 50-70% lower TCO vs. multi-vendor stacks through unified architecture combining streaming analytics, Gen AI, and predictive ML
- Implemented real-time streaming analytics processing thousands of events/second with zero data loss using OCI Streaming (Kafka-compatible) and Delta Lake ACID transactions, enabling time travel and full audit trails.
- Built AI-powered customer intelligence system analyzing 500+ reviews in minutes using native Spark SQL integration with Llama 3.3 70B, achieving 80% faster deployment than traditional NLP pipelines with 75+ language support
- Deployed GPU-accelerated TensorFlow models for churn prediction (85% accuracy, 0.90 AUC-ROC) and collaborative filtering recommendations delivering \$24 ROI per \$1 retention spend and 200% revenue uplift

### Technical Support Engineer | Cyshield

Egypt • October 2024 – August 2024

- Collaborated with cross-functional engineering teams to debug complex software issues, improving system reliability and reducing downtime through proactive monitoring
- Developed automated scripts for system performance monitoring and alerting, identifying patterns in logs and error reports to suggest stability improvements
- Supported software deployment and configuration for clients, ensuring seamless integration with existing systems and maintaining high customer satisfaction

### Digital Operations Consultant | Stellar Consulting

UAE, Egypt & Saudi Arabia • June 2024 - September 2024

- Delivered custom technical solutions for pharmaceutical clients (Pfizer, AstraZeneca) by developing registration apps and websites that streamlined event operations and enhanced attendee engagement
- Collaborated with Egypt's Deputy Health Minister to integrate technology solutions for healthcare events, demonstrating ability to work with high-level stakeholders on critical initiatives

## Innovation Consultant | Mooevo

Madrid, Spain • September 2022 - December 2022

- Conducted qualitative and quantitative market research analyzing B2B and B2C routes to market, presenting findings to stakeholders through weekly presentations
- Monitored campaign performance metrics and provided data-driven recommendations to optimize marketing strategies

## EDUCATION

---

### Bachelor of Science in Computer Science & Artificial Intelligence

IE University Madrid • Madrid, Spain • September 2020 - July 2024

**Relevant Coursework:** Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Statistical Learning, Chatbots & Recommendation Engines, Algorithms & Data Structures, Database Systems, Cloud Computing (Azure), Software Development, Network Programming

## KEY PROJECTS

---

### RAG Document Q&A Application with Oracle Cloud Infrastructure

- Built full-stack production RAG system integrating Next.js, Oracle Autonomous Database 23ai vector search, and Anthropic Claude Sonnet 4.5
- Implemented sophisticated document processing pipeline with optimized chunking strategies and 1024-dimension embeddings via OCI Cohere
- Demonstrated practical integration of vector databases, LLMs, and cloud services in enterprise-grade AI application architecture

### Oracle AI Data Platform - Executive Analytics Demo Suite

- Developed three Jupyter notebooks showcasing unified AI data platform: real-time streaming with Delta Lake, Gen AI integration with Llama 3.3 70B, and GPU-accelerated predictive ML
- Achieved 85%+ churn prediction accuracy and 0.90 AUC-ROC with TensorFlow, processing 500+ customer reviews with automated sentiment analysis across 75+ languages
- Quantified business impact: \$24 ROI per \$1 retention spend, 200% recommendation-driven revenue uplift, \$100K+ total value from ML pipeline

### Blemish Cosmetics - E-commerce Platform

February 2022 - May 2024

- Founded and scaled niche skincare business, managing end-to-end operations including product sourcing, inventory, and customer service
- Built responsive e-commerce website using React and Node.js, implementing multi-channel marketing strategy across social media.
